

## **PALLET CARRIER**

- We build a complete range of pallet carriers for fragile products like pet food.
- With flow rates of 10 to over 50 tons per hour, made from mild or stainless steel.
- We configure every one of our carriers to match the products to carry.
- Optionally we can offer you solutions for limiting retention risks by adapting a rounded base casing.
- At your request we can adapt the safety components and options like rotation sensors, material passage detectors, jamming sensors and vacuum systems.
