

SETER ROTARY FEEDER

- We offer you a wide range of rotary feeders.
- Our rotary feeders are designed for smooth gravity feeding of powder or granular products.
- The product flow is spread consistently across the entire width of the feeder and ensure uninterrupted supplies to machines like crushers, sieves or continuous flow mixers.
- Made of mild or stainless steel.
- For flow rates of 5 to over 80 m³ per hour.
- With secure, wide access door for cleaning the cells if needed.
- Our rotary feeders may optionally be fitted with a magnetic detector and a stone remover for feeding a crusher.
