

SUCTION TECHNOLOGY

- We can supply you with a wide range of filters to meet your needs to capture dust from your silos or to address various dust capture issues at your workstations.
- We perform the design work and integrate the systems for capturing dust at the bulk product loading stations.
- We install the tank loading sleeves for working with powder or pellet products.
- We offer you the consumables needed to maintain your filters, ranging from the unclogging plate, fans to supplying filter sleeves.
- We are able to come and audit your vacuum network and advise you on how to improve its efficiency.
