

TUBE OR AUGER SCREW FEEDER

- We offer a wide range of screw feeders able to handle up to 150 tons per hour.
- In tubes or in augers for dosing, extracting or transporting powder or granular materials.
- Speed and power levels to suit the application.
- Made of mild or stainless steel.
- Steady stream or strip output.
- Progressive pitch for dosing hard to handle products such as minerals.
- Optionally we can adapt opening base panels, bearings with sealing glands and braids, end of screw covers, for precise dosage.
- For process control purposes we can equip the screws with rotation, clogging and material passage detectors.
