

BUCKET LIFTER

- We manufacture a full range of bucket lifters for cereals, granulates or minerals.
- With flow rates of 10 to over 400 tons per hour, made from mild or stainless steel.
- We configure every one of our lifters to match the products to carry.
- Optionally we can offer you solutions for limiting any cross contamination risk, including fully emptying lifter feet.
- At your request we can adapt safety elements like rotation sensors, strap offset checks, bearing temperature sensors and vacuum systems as required.
- We can provide you with a control cabinet that centralises all of the safety components for a lifter.
