

SETER ENZYME AND COATING MACHINE

This equipment is used to coat granulose products with a liquid material (1 to 8% liquid content).

- Diameter: 400 to 500mm.
- Flow rate: 5 to 60 tons per hour.
- One or two 4 nozzle sprayers for each coating box and two boxes may be superimposed.
- Nozzle characteristics are calculated for an optimum coating result.
- A special enzyme coating box is available on request.
- The coating box can be heat lagged and thermally controlled if necessary.
- Feeding is through a distributor regulated by a variable speed drive.
- Easy cleaning.
